Art Unit 1711

All previous rejections and/or objections are hereby withdrawn.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-6 are rejected under 35 U.S.C. § 102(b) as being anticipated by Matisons et al., CAPLUS AN 1999: 541980, abstracting Book of Abstracts, 218th ACS National Meeting, New Orleans, August 22-26 (1999), American Chemical Society.

Matisons et al. disclose a supported metallocene catalyst produced by reacting a zirconocene with a vinyl silane moiety containing silica. Note the Abstract.

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The Declaration under 37 CFR 1.132 filed 7-28-03 is sufficient to overcome the rejection of claims 1, 2 and 4-6 based upon Saunders.

Art Unit 1711

Applicants' remarks are moot since all previous rejections have been withdrawn.

No claims have been cancelled since the case is not ready for allowance in view of the above new grounds of rejection. Unfortunately there was no time to contact applicants regarding the new grounds of rejection.

This action is not being made FINAL.
